## REALISING YOUR DREAM

### THE DREAMERS WHO DO® MODEL (DWD MODEL)

What would be your dream job?

How to find that organization, that company, that context where your dream job adds value?

How to land your dream job?

What do you need to realize this 'professional' dream?

#### TRAJECTUM HUMANLY RESOURCEFUL: OUR ROLE

We will be your compagnon the route for you to take **3 steps** to get from dream to realization, from ambition to action. DREAM, STAND, PUSH

We have only one objective: you finding your **dream job!**

**We will be your success watcher**

#### STEP 1: DREAM

In this step we invite you to dream. How do you envision your career, your professional activity, your life in the future? **What is your ambition?** We help you to describe it as if it is already a reality today.

We start from the inside: **your inner compass.**

Your internal compass consists of your WHY and your HOW.

- Your WHY is the answer to the question: Why do I do what I do? It is your origin story. We look at your life so far, where do you come from, what are your stories?
- Your HOW consist of your values, your identity (who do you want to be), your expertise, your experiences, your competencies: those who come natural to you and those you have learned.

Dreaming can start once you can formulate your inner compass.

Who do you want to be, how do you see yourself in the future, what more do you want to do and experience in your life?

#### STEP 2: STAND

**How do you talk about your dream, how do you share your ambition with others?** A dream or an ambition only exists when you talk about it. You have to find the right words so that others really understand what you want to say. So that they can help you to realize your dream.

When you share your ambition, **how to ensure that others believe it is possible?** It all starts with you believing in your dream and having the self-confidence to talk about it.

Where does this self-confidence come from? You will find the answers in your secure base experiences. We will have a close look at these together.

As soon as others can see your dream and they too believe you can realise it, they will be inclined to make suggestions as to where and how they can help you.

And so when you have pushed your ambition into the world and people are willing to help you to realize this ambition, you can start implementing it.

### STEP 3: PUSH

We help you to formulate **the projects which are essential** in order to realize your dream. We name them **your WIN projects**.

The questions to ask and act upon are:

- Which skill do I have to learn or to improve?
- What do I want to get better at?
- How do I keep focus during my search?
- How do I ensure that I present myself clearly online and offline?
- Which networks shall I activate, set up, expand, ...?
- ...

Clear projects, with set start and end dates.

### LET LOVE RULE

We at TRAJECTUM Humanly Resourceful are your "**compagnon the route**", **your success is our success**. Love, mutual support and help are essential to realize dreams.

As our Founder Hilde Helsen says: Love can only really help you when it can say anything, criticise everything. The fact that love can sometimes come from where you least expect it is one of her key messages. This help and support, this love can only really do its job if you as the receiver are willing to accept it.

For that reason, it is vitally important that you consciously and actively open your mind for things that you perhaps do not yet understand, for things that you never expected, never mind that you would one day be able to rely on them

All along the process we will invite you and **encourage you to have this open and curious mind**.
